4. Wait until the area is completely dry to the touch.
5. Apply your ostomy pouching system or adhesive as usual.

Frequently Asked Questions

Q: Are skin protective wipes always needed?

A: No. Skin protective wipes are optional. Use to protect the skin from bodily waste or irritation associated with adhesive removal. A skin protective wipe may be used when removing adhesive/tape frequently.

Q: Can skin protective wipes be used with extended wear skin barriers?

A: It is not recommended to use skin protective wipes or any other similar product if you are using an extended wear skin barrier as this may decrease wear time.

Q: Do Adapt skin protective wipes help to prevent skin-related issues?

A: Yes. No sting skin protective wipes are a gentle, water-based alternative developed to minimize the irritation and pain that can occur with wipes that contain alcohol. They also offer effective skin protection, helping reduce the risk of skin irritation associated with repeated application and removal of the adhesive or skin damage from bodily fluids.

Q: Does the skin protective wipe allow the adhesive to adhere better?

A: No, it is not an adhesive. It simply adds a protective layer to the surface of your skin.
